Chief Comm's Order

23-1-73.

The suggestion made in para 1 of this memo is inadmissable, but the District officer is already authorised to sanction in special cases the removal of Date trees standing on occupied land, where such is required by the holder for purposes of cultivation & the rights of the Toddy contractor will not thereby be interfered with. —

2. Under the terms of the Survey Guarantee, all trees on Kandyam land become the property of the holder from date of settlement, but no one, but the Toddy contractor is at liberty to draw toddy from such trees. the requisite permission for his doing so being a matter for settlement between him & the Pattadar. —

3. Stringent Orders have been already issued me directing all Toddy Groves which are the property of Govt to be marked off & enclosed, in view to their strict reservation for Govt purposes, & it might be well to enquire what progress has been made in carrying the same art. —

With regard to unoccupied lands on which Date or other trees stand not included in such groves or reserved forests no number should be granted for cultivation which contains trees of

of either description of such value as to make
it desirable for Govt to reserve the same, and
the attention of Supt[s] will be drawn to the subject
with the remark that it is one that demands
much watchfulness - It has recently been
brought to my notice that, in some of the new
settled Talooks, some very valuable tracts of this
sort have been allowed to be taken up, the object
of the persons so doing being, it is believed, merely
to cut down & dispose of the trees as soon as they
can do so, when they will be at liberty to throw
up the land again - Such attempts should be
duly guarded against. —

/Circular/

To

The Commissioners of the
three Divisions

Sir

Strugent orders have been alreas
issued by the Chief Commr directing
all Toddy groves which are the propert
of Govt to be marked off and enclosed
in view to their strict reservation fo
Govt purposes, and I am directed to
enquire what progress has been
made in carrying the same out.

2 With regard to unoccupied lan
~~and dedicated to~~ other trees ~~stan~~
not included in such groves or
preserved forests, no number should
be granted for cultivation, which
contains trees of either description
of such value as to make it desirab
for Govt to reserve the same and
I am ~~directed to draw~~ to request your attentio
to this subject, and to remark that
it is one that demands much
watchfulness. It has recently
been brought to the Chief Commrs
notice that in some of the newly
settled Talooks, some very valuable
tracts of this ~~sort~~ description have been allow
to be taken up, the object of ~~the~~ such
~~applicants~~ persons ~~so doing~~, being, it is believed,
merely to cut down and dispose of

the trees as soon as they can ~~do so~~ commence to lop, and then when they will be at liberty to throw up the land again. Such attempts and if they succeed ~~must~~ fail should be only guarded against.—

30/1/73
